Ask ChatGPT

User:

How much detergent should I add?

Assistant:

The amount of detergent needed varies depending on the size of your load and the type of washing machine you have. It is best to check the back of the detergent box or bottle for specific instructions on how much detergent to use. Additionally, you can also look for any labels or markings on your washing machine that indicate the recommended amount of detergent. Following the manufacturer's guidelines will ensure that you use the appropriate amount of detergent for your laundry.
